

# Easter Place Value

Roll a dice to move around the board. Use the blocks to name the numbers. The first player to reach the finish line wins!

The board features a central rabbit on a purple semi-circle with the instruction "hop back two spaces". To the right is a red box labeled "6 twinkl Creamy Eggs" and a glass jar filled with chocolate bunnies. The board is divided into several sections with different instructions and block arrangements:

- Start:** A blue box labeled "Start" is at the bottom left, next to three decorated Easter eggs.
- hop on three spaces:** A blue box with this instruction is in the upper left section.
- miss a turn:** A pink box with this instruction is in the middle left section.
- hop on two spaces:** An orange box with this instruction is in the lower middle section.
- Finish:** A blue box labeled "Finish" is on the right side.

Various sections of the board contain blocks representing numbers. For example, the top section shows a semi-circle with blocks representing the number 15 (three tens and five ones). Other sections show blocks representing numbers like 12, 18, 25, and 30. The bottom section shows a semi-circle with blocks representing the number 21 (two tens and one one).
